

UML OF BOSTON CONVENIENCE TRANSPORT

Constraints Explanation:

1) self.ParcelBasedgoods.Weight > 11 lbs : This constraint takes the weight of goods from goods table . A requesttype , if 'parcel-based' can be considered if and only if the weight of the goods or multiple goods together is more than 11lbs. Request of transportation of goods with weight less than 11lbs will be declined.

2) self.Worksat.HoursWorked >= 1 hour : This constraint states that for a labour to be paid hourly he needs to work for minimum of 1 hour. If he works for less than 1 hour he will not be paid.
